

Sustainability

Quintessence Hotel aims to promote the Fine Arts of Living and its values through the sharing of knowledge, education and preservation of resources. We strive to set practical day-to-day guidelines to follow commitments that are based on the structure of the vision. Among those we initiate strong relationships with local farmers and fishermen and encourage responsible fishing to protect the biodiversity of the oceans. We contribute to renew natural resources by reducing food waste and using seasonal products locally sourced. We limit the environmental impact with regards to energy, water and waste. Our state-of-the-art water facilities are consistent with the highest standards for healthy living, a cornerstone at Quintessence. We create relationships at the local level, between people working with different means but sharing the same objectives (to diminish food waste, develop local and sustainable food production, maintain biodiversity). We encourage our dining and hotel teams and ensure through local and international events, that our actions and our words contribute to make the world a better place through cuisine and hospitality.
